

Regarding the EU Timber Regulation

The products at Holmen Board and Paper's paper mills are produced from Controlled wood.

The controlled wood originates from responsible managed forests and sawmill chips.

Our paper products are made using virgin fibers bought from another business area within Holmen - Holmen Skog. Some of the wood used in the production comes from chain of custody certified forests. All wood used in the products is Controlled wood.

Holmen Skog, which is our supplier of wood, declares that they fulfill the requirements for the EU Timber Regulation. The requirements for Sweden are developed in dialogue with the Swedish Forest Agency.
