

Statement regarding recyclability of Holmen Paper's products

All paper products produced at Holmen Paper mills are natural fibre based paper products, suitable for recycling according to "European list of recyclable paper and board" **DIN EN 643:2014**.

EN 13430:2004 "Packaging - Requirements for packaging recoverable by material recycling" is covering the recyclability of finished packaging products. Our paper is suitable for material recycling according to DIN EN 643:2014 and therefor suitable to be used in end-products that comply with EN 13430:2004.

Paper is biological degradable, and our products are not considered dangerous for the environment.
